label.product_info

Specification

Reinforcement:	2 layers of high tensile steel wire braid
max operating temperature:	+100°C
Color inner tube:	black
Cover:	Synthetic rubber, wear resistant, black
Norm/Standards:	EN 857 - 2SC

Media:	water and water-based media up to + 70 ° C; Hydraulic oil based on mineral oil and water emulsions and aqueous glycol solutions
MSHA-Approval:	no
application:	High-pressure applications
Temperature range:	- 40 ° C to + 100 ° C, water and water-based media up to + 70 ° C; Hydraulic oil based on mineral oil and water emulsions and aqueous glycol solutions
Inner tube:	Synthetic rubber, black
Color cover:	black

label.benefit

Even better bend radius and more compact than the 2SN hose. Compact alternative to 2SN.

label.accessories

For special applications with difficult conditions skiving-ferrules are available. For details, please refer to our current crimping-charts.

label.tip

Hose lines must not be made of tubes that were already part of a hose line in use previously.
